

THE BENEFITS WE BRING TO WELL OPERATORS

The LinRich Solutions team has a proven track record working with Well Operators globally to improve on-time performance and to ensure that their drilling and pressure control equipment system requirements are in compliance with all applicable internal, industry and governmental safety and performance standards. We understand the critical needs of well operators and we have a proven track record ensuring comprehensive subsea pressure control system design, integration and operational compliance. The ultra/deepwater operating environment is no place for second guessing nor second best. The LinRich Solutions team understands the multiple and yet interconnected challenges facing well operators. We work on behalf of well operators to ensure that equipment will perform in accordance with your requirements anywhere in the world.

CHALLENGE – A Well Operator needed help finding ways to reduce \$300MM in non-productive time associated with BOP stack and controls systems on various rigs.

SOLUTION – We reviewed existing rig contracts to understand commercial and technical requirements. We then reviewed all technical and well control manuals and provided technical oversight and recommendations for reducing 10% of trouble time per rig.

"For your most challenging deepwater pressure control equipment challenges, put LinRich Solutions to the test"
